Attention All Optio, Jetform, CreateForm Users,

Are you currently using a Document Management/Electronic forms automation package that is no longer supported or needs to be updated to a current release?

With budgets tight these days upgrading or updating software can be a difficult financial decision. Minisoft is pleased to offer its eFORMz document management package with special trade up pricing just for companies and organizations constrained by tight budgets.

Minisoft eFORMz is a document management solution that will generate all of your critical business forms and documents. eFORMz is platform independent operating on Linux, HP/UX, Windows, IBM iSeries, AIX and Solaris. Included with eFORMz is the ability to email PDF or HTML documents. The eFORMz DataDIRECT feature allows users to populate forms directly from a database.

Companies that evaluate and purchase eFORMz before January 31, 2010 will be eligible to receive 35% off our standard list price! Minisoft will also include the first year of eFORMz product updates with your purchase. This offer will be extended to users of **Optio, CreateForm, Jetform, Flexform, Formfast, Formation and Fantasia**. Please contact Minisoft for a list of competitive electronic forms products that qualify for this offer.

We invite you to download an eFORMz product evaluation from the Minisoft website ([www.minisoft.com](http://www.minisoft.com)).

And as always, Minisoft Sales and Support are just a phone call away at:
