

System Requirements

Contact Minisoft for exact hardware requirements based on the quantity and type of printers being used.

Operating Systems Supported

Server: Windows Server (2012 and later), Linux, AIX, HP-UX, iSeries/AS400, Apple OSX and OpenVMS

Workstation: Windows 10 and later; macOS High Sierra and later

System Requirements

Java 1.8 minimum

64-bit operating system with current patches installed

Windows install: Java 1.8 is automatically installed with the eFORMz installer program

iSeries/AS400: Both V5R4 and V6R1 only support Java 1.6. V5R4 is out of service life. V6R1 is out of normal life and will be off extended support 9/2018. We recommend V7R1, which is the first release to support Java 1.8

eFORMz Memory Requirements (Recommended)

Note: The number of cores refers to the number of "physical" cores allocated to a virtual system

Small (1 to 10 desktop printers up to 8,000 pages per day)

✓ 4GB of memory allocated to Java JVM, 4 CPU cores (3GHz) and 8GB of disc space

Medium (10 to 25 desktop printers or up to 4 enterprise printers up to 30,000 pages per day)

✓ 8GB of memory allocated to Java JVM, 6-8 CPU cores (3GHz) and 16GB of disc space

Large (25+ desktop printers or 5 to 10 enterprise printers up to 120,000 pages per day)

✓ 16GB of memory allocated to Java JVM, 12-16 CPU cores (3GHz) and 32GB of disc space
